

User Study

Instructions for Grading. **PLEASE READ CAREFULLY.**

Imagine you are a user chatting with a chatbot service like Gemini, ChatGPT, DeepSeek etc. On each page you will see:

- A question: vague or ambiguous user message.
- Two clarification questions generated by different chatbots (labeled *Answer A* and *Answer B*) – these are follow-up questions the bot asked to better understand the user's intent.

Please rate each answer (answer A and answer B) on the following criteria :-

- **Precision and Focus:** How exactly the clarification question zeroes in on the missing detail or ambiguity in the original prompt. For example, responses providing examples to nudge the user to ask a more detailed question to the model.
- **Immediate Editability:** How easily you can rewrite your original prompt using only this question. For example, responses providing example choices to the user.
- **Contextual Fit:** How well the question aligns with the intent of the original programming task.

How to rate:

You will be asked to give a score on a **scale from 1 to 5:**

"**1** = Strongly prefer **Answer A**"

"**5** = Strongly prefer **Answer B**"

"**3** = Both responses are equally good."

You will see **one Original Question per page**, with both answers visible at the same time.

Please read both answers carefully before rating.

You will complete **10 total evaluations**.

NOTE: The chatbots were forced to stop outputting text after 50 words. As a consequence, there may be some responses that look like they're cut off or incomplete. Kindly grade only the clarification question asked in Answer A and Answer B (ignoring irrelevant text; e.g., non-English like alphabets).

Question 1

JavaScript

```
const data = [1, 2, 3];  
const result = data.map(num => num * 2;  
console.log(result); // TODO: handle empty array
```

Answer A: What is the expected behavior or outcome when the input array `data` is empty?

arti dari pertanyaan ini adalah untuk memastikan pemahaman yang komprehensif tentang apa yang diharapkan dari kode tersebut. Pertanyaan ini

Answer B: What is the intended behavior when the input array `data` is empty? Are you expecting an error to be thrown, or is there a desired default behavior (e.g., return a default value, log a message)?

jason

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 5

Immediate Editability (1-5): 5

Contextual Fit (1-5): 3

Question 2

I have an issue with my API call.

Answer A: Okay, to help me understand the issue better, could you tell me: **What kind of API call are you experiencing?** (e.g., a specific API endpoint, a particular function within an API, or a general problem with using the

Answer B: Okay, let's figure out what's going on. To help me understand the issue better, could you tell me:

- **What API are you using?** (e.g., Google Maps, Twitter API, a custom

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 3

Immediate Editability (1-5): 2

Contextual Fit (1-5): 2

Question 3

I'm confused about a concept in programming.

Answer A: Could you tell me what programming concept you're struggling with?

लवनीय Apex

Answer B: Could you tell me more about the programming concept you're confused about? Specifically, what part of it is confusing you? For example, are you unsure of the terminology, the underlying logic, or how it relates to something else?

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 5

Immediate Editability (1-5): 5

Contextual Fit (1-5): 3

Question 4

Java

```
public class Example {  
    private int value;  
    public Example(int value) {  
        this.value = value;  
    }  
}  
  
// TODO: Add getters
```

Answer A: What is the intended use of the `value` field within the `Example` class? Specifically, what functionality or data structure do you expect this field to represent or perform? (e.g., a number, a string, an array)

Answer B: What is the purpose of the `value` variable within the `Example` class?
अरविंद अरविंद अरविंद अरविंद अरविंद अरविंद अरविंद अरविंद अरविंद अरविंद अरविंद

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 1

Immediate Editability (1-5): 1

Contextual Fit (1-5): 3

Question 5

JavaScript

```
const numbers = [1, 2, 3, 4];  
const doubled = numbers.map(num => num * 2);  
console.log(doub); // Typo in variable name
```

Answer A: What is the intended purpose of the code snippet?jeroys

^

!سلمو

The prompt asks about the intended purpose of the code. It's a simple code snippet that demonstrates using

Answer B: What is the intended purpose of the code snippet? What kind of output are you expecting to see from the `doub` variable?

John_Coder7877

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 3

Immediate Editability (1-5): 3

Contextual Fit (1-5): 3

Question 6

JavaScript

```
var myArray = [];  
function addElement(element) {  
    myArray.push(element);  
    // TODO: handle duplicates  
}
```

Answer A: What is the intended use case for this `addElement` function? (e.g., is it intended to add elements to a list, a set, or something else?)
jones
Authored by GPT-3

Answer B: Okay, let's clarify the intent behind the code snippet. Could you tell me what you're hoping to achieve with this code, or what problem are you trying to solve? Specifically, what functionality are you aiming for? For example

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 3

Immediate Editability (1-5): 2

Contextual Fit (1-5): 3

Question 7

Java

```
public class Sample {  
    private int number;  
  
    // TODO: Add constructor  
  
}  
  
Sample s = new Sample();
```

Answer A: What is the intended purpose of this **Sample** class? (e.g., is it a simple data structure, a class representing a number, etc.?)jero

Answer B: What is the intended purpose or functionality of the **Sample** class? Specifically, what kind of data should the class be designed to hold and how should it interact with the outside world?

John Miller

That's a great question!

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 2

Immediate Editability (1-5): 2

Contextual Fit (1-5): 3

Question 8

There's an issue with my API integration.

Answer A: Okay, let's figure out what's going wrong. Could you tell me what API you're using and what specific issue you're encountering? For example, are you getting errors, or is it just not working as expected?

Answer B: Could you please provide more detail about the specific issue you're experiencing with your API integration?

[https://translate.google.com/translate?sl=en&tl=en&text=There%20is%](https://translate.google.com/translate?sl=en&tl=en&text=There%20is%20an%20issue%20with%20my%20API%20integration%3F)

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 1

Immediate Editability (1-5): 2

Contextual Fit (1-5): 3

Question 9

I'm confused about data structures.

Answer A: Okay, let's clarify. Could you tell me what area of data structures you're finding confusing? For example, are you unsure about:

- What data structure is the problem trying to represent?
- How data structures are

Answer B: Okay, let's start with a simple question: **Can you briefly describe what a data structure is, in your own words?**

Jerry

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1-5): 1

Immediate Editability (1-5): 1

Contextual Fit (1-5): 3

Question 10

I need help with a function.

Answer A: Okay, please tell me about the function you need help with! What does it do?

информации submit

Answer B: Okay, let's figure out how to optimize your function. Could you please share the function you're working on and tell me what part you're struggling with specifically? For example, are you having trouble with performance, readability, or something

Your response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."
