

User Study

Instructions for Grading. **PLEASE READ CAREFULLY.**

Imagine you are a user chatting with a chatbot service like Gemini, ChatGPT, DeepSeek etc. On each page you will see:

- A question: vague or ambiguous user message.
- Two clarification questions generated by different chatbots (labeled *Answer A* and *Answer B*) – these are follow-up questions the bot asked to better understand the user's intent.

Please rate each answer (answer A and answer B) on the following criteria :-

- **Precision and Focus:** How exactly the clarification question zeroes in on the missing detail or ambiguity in the original prompt. For example, responses providing examples to nudge the user to ask a more detailed question to the model.
- **Immediate Editability:** How easily you can rewrite your original prompt using only this question. For example, responses providing example choices to the user.
- **Contextual Fit:** How well the question aligns with the intent of the original programming task.

How to rate:

You will be asked to give a score on a **scale from 1 to 5:**

"**1** = Strongly prefer **Answer A**"

"**5** = Strongly prefer **Answer B**"

"**3** = Both responses are equally good."

You will see **one Original Question per page**, with both answers visible at the same time.

Please read both answers carefully before rating.

You will complete **10 total evaluations**.

NOTE: The chatbots were forced to stop outputting text after 50 words. As a consequence, there may be some responses that look like they're cut off or incomplete. Kindly grade only the clarification question asked in Answer A and Answer B (ignoring irrelevant text; e.g., non-English like alphabets).

Question 1

I need assistance with a function.

Answer A: Okay, please share the function code you're working on. That will help me understand what you're trying to accomplish and how you're approaching the problem.

David

Let me know the code and what you're hoping

Answer B: Okay, to help me understand what you need, could you tell me: **What kind of function are you working on?** (e.g., a Python function, a JavaScript function, a function for a specific task like calculating something, etc

Your Response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1–5):3

Immediate Editability (1–5):4

Contextual Fit (1–5):3

Question 2

Python

```
import requests

# TODO: Ensure headers are set for API request
response = requests.get('https://api.example.com/data')
print(response)
```

Answer A: What is the expected response from the API endpoint (e.g., a status code, a specific format, or a particular data structure)?

Ronny

Answer B: Please clarify what you want to achieve with this code snippet. Specifically, what API endpoint are you trying to access and what outcome are you hoping to get from the API response? For example, are you trying to:

- Retrieve data from

Your Response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1–5):4

Immediate Editability (1–5):3

Contextual Fit (1–5):3

Question 3

I'm facing issues with deploying my website.

Answer A: Could you briefly describe the specific issues you're encountering during deployment? (e.g., errors, slow speeds, unexpected behavior, etc.)

भवदीय

Ultimately, I need more detail to understand

Answer B: Okay, let's figure out the root cause of your deployment issues. Could you tell me which part of the deployment process is causing problems? For example, are you experiencing errors related to:

- **Server access/permissions?**

Your Response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1–5): 2

Immediate Editability (1–5):3

Contextual Fit (1–5):3

Question 4

I'm confused about this library.

Answer A: Okay, let's clarify. Could you tell me what library you're referring to and what specifically you're finding confusing about it? For example, are you unsure about its purpose, how it works, or what features you're struggling

Answer B: Okay, to help me understand what you're confused about, could you tell me **what library you're referring to?**

Your Response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1–5):1

Immediate Editability (1–5):2

Contextual Fit (1–5):3

Question 5

I need assistance with debugging.

Answer A: Okay, to help me understand how to best assist you with debugging, could you tell me:

What kind of code are you working on, and what specifically are you struggling with? (e.g., a particular function, a specific error

Answer B: Okay, let's figure out what's causing the problem. To help you debug effectively, could you tell me:

1. **What programming language are you using?** (e.g., Python, JavaScript, C++, etc)

Your Response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Precision and Focus (1–5):2

Immediate Editability (1–5):3

Contextual Fit (1–5):2

Question 6

Python

```
import pandas as pd

df = pd.read_csv('data.csv')

# TODO: Clean data
print(df.head())
```

Answer A: What kind of data is in the 'data.csv' file? (e.g., is it a table of sales data, a list of customer records, etc.?)

jero
लाल

Answer B: Okay, let's clarify the prompt. What specific data cleaning or analysis are you hoping to perform on the DataFrame `df` after reading it? For example, are you looking to handle missing values, convert data types, or perform a

Contextual Fit (1–5):4

Question 7

HTML

```
<html>
<head>
  <title>My Page</title>
</head>
<body>
  <h1>Welcome to my page
  <p>This is a paragraph.
```

Answer A: What is the main purpose or goal of this page?

न्ना

jerne

Answer B: What is the primary purpose or goal of this page?

यूँय!

Peeve

You're right to ask! The page is a simple welcome message with a paragraph. It's a good starting point to understand the

Your Response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."

Immediate Editability (1–5):4

Contextual Fit (1–5):3

Question 9

JavaScript

```
function fetchData(url) {  
  // TODO: handle errors  
  let response = await fetch(url);  
  return response.json();  
}
```

Answer A: What kind of data are you expecting to be returned from the URL? (e.g., JSON, HTML, XML, or something else?)

JonesData's response is incomplete. It's a fetch function that's missing

Answer B: What is the expected data format returned by the `url` parameter? (e.g., JSON, XML, plain text, etc.)

न्ना

वत्रा.

Your Response:

How to rate:

You will be asked to give a score on a scale from 1 to 5:

"1 = Strongly prefer Answer A"

"5 = Strongly prefer Answer B"

"3 = Both responses are equally good."
